Arminia III – the practical home care bed in a homely design

electronic switch mode power supply unit, directly integrated behind power plug (24-volt drive system)

24-volt drive system optionally available

adaptor bushing of the plug for the connection of the electronic switch mode power supply unit

185 kg safe working load, 4-section mattress base, electrically adjustable

fall protection height of side rail: approximately 38 cm

hand control with selective locking function

lowered foot section

lower leg rest liftable by ratchet

high-quality and robust castor TENTE

clearance with all commercially available lifters

drive system LINAK being easy to maintain and durable

extremely solid construction of side rail, easy mounting of the side rail guide

your advantages:

- **quality and durability**

The home care bed Arminia III is extremely solid constructed, so that it fulfills the requirements in daily care perfectly. The high quality ensures you a home care bed which is durable, robust and easy to maintain and which decisively minimizes the follow-up costs. The wooden surround creates a homely ambience. A bed in which the resident feels very comfortable.

- **economic efficiency**

The price-performance ratio is exceptionally reasonable. Nevertheless there was no economizing concerning the construction and the material. Especially the use of high-quality materials ensures Burmeier's quality philosophy.

- **24-volt drive system optionally available**

Also with this system the maintenance intervals can be extended to 2 years (see user manual). Leakage current measurements at the home care bed in the interval of 10 years. Conditions for this can be enquired from Burmeier. Residents are protected in the best possible way, as all 230 volt powered components are outside of the bed.

- **fall protection height of side rail: approx. 38 cm**

Mattress and pressure ulcer systems of max. 16 cm thickness can also be placed in the home care bed without adaptable side rail raisings. In many cases costly raisings are not necessary.
